

Soil PET Pilot Project

Starting Jan 2022!

50% off soil testing!

Can I apply?

This program is available for beef, sheep and cropping enterprises. For the January 2022 intake, you must be located in one of the following sub-catchments:

- Yeoval
- Cumnock
- Baldry
- Toongi
- Suntop/ Artherville

What's in it for me?

- Half price soil testing for your farm (4/farm top soil and sub soil)
- Organic carbon testing
- MIR analysis
- Results and advice at a local workshop
- Personalised, one-on-one agronomic advice
- *FREE* Soils Resource Folder and pH kit

When

Soil sampling by landholders/ managers to begin early January. Local "soils" workshop to be held last week of February 2022.

Congratulations

A huge congratulations to the Little River Community which have been successful in securing funding from this years Smart Farms Small Grants Program.

Last Friday, the Little River Committee met with the Minister for Agriculture, Hon David Littleproud and Federal Member for Calare, Hon Andrew Gee to introduce Little River's Soil PET (People, Education, Technology) Pilot Project.

The project aims to assist farmers to improve soil management through the use of soil data for evidence-based intervention.

Well done everybody!
